HERTZ

A complete musical app

TEAM HERTZ
- ➜ AKASH KAIT (Back-End Software Developer)
- ➜ AYUSHI SAHU (Design Head & Back-End Software Developer)
- ➜ JASKARAN SINGH (Database Manager & Front-End Software Developer)
- ➜ RAHUL KHANNA (Front-End Software Developer)

Problem Statement:

For various tasks (music player, genre detector, song detector, chords and tabs for songs, lyrics for a song) , a user needs to switch applications thus consuming time and space.

Problem Solution:

HERTZ - A complete musical app

Overview

Hertz is a java based multifunction application. A complete musical app, it provides everything a person needs to know about a song.

Goals

1. To detect a song and give its genre as the output
2. For the detected song give lyrics, chords and tabs (for particular instrument) as output.
3. Use as a music player.

Specifications
